Journal of Fluid Mechanics Volume 513 **25 August 2004**

L. K. Su & M. G. Mungal	Simultaneous measurements of scalar and velocity field evolution in turbulent crossflowing jets	1
H. Fan	Symmetry breaking, ring formation and other phase boundary structures in shock tube experiments on retrograde fluids	47
S. Rafaï, D. Bonn & A. Boudaoud	Spreading of non-Newtonian fluids on hydrophilic surfaces	77
K. Xu & Z. Li	Microchannel flow in the slip regime: gas-kinetic BGK–Burnett solutions	87
F. Moisy & J. Jiménez	Geometry and clustering of intense structures in isotropic turbulence	111
S. Zuccher, P. Luchini & A. Bottaro	Algebraic growth in a Blasius boundary layer: optimal and robust control by mean suction in the nonlinear regime	135
D. G. Crowdy	Explicit solutions for a steady vortex–wave interaction	161
M. Torrilhon & H. Struchtrup	Regularized 13-moment equations: shock structure calculations and comparison to Burnett models	171
B. Knaepen, S. Kassinos & D. Carati	Magnetohydrodynamic turbulence at moderate magnetic Reynolds number	199
M. Giona, S. Cerbelli & V. Vitacolonna	Universality and imaginary potentials in advection–diffusion equations in closed flows	221
F. J. Higuera	Current/flow-rate characteristic of an electrospray with a small meniscus	239
N. Lecoq, R. Anthore, B. Cichocki, P. Szymczak & F. Feuillebois	Drag force on a sphere moving towards a corrugated wall	247
P. Dimitrakopoulos	Stress and configuration relaxation of an initially straight flexible polymer	265
Z. Lu & S. Ghosal	Flame holes and flame disks on the surface of a diffusion flame	287
D. R. Fuhrman, P. A. Madsen & H. B. Bingham	A numerical study of crescent waves	309
T. E. Jupp & A. W. Woods	Reaction fronts in a porous medium following injection along a temperature gradient	343
U. Kânoğlu	Nonlinear evolution and runup–rundown of long waves over a sloping beach	363

BOOK REVIEWS

Handbook of Mathematical Fluid Dynamics, Vol.2, edited by S. Friedlander & D. Serre 373

Fundamentals of Computational Fluid Dynamics, by T. K. Sengupta 378
